

CORE Higher Education Group Selects Liz Cardello, RPh, as Newest Senior Director

Cardello joins the educational technology software provider after 17 years with the American Pharmacists Association

September 29, 2020 (Providence, RI) -- CORE Higher Education Group announced that Liz Cardello, RPh, has been selected as the newest Senior Director of Business Development for the EdTech company.

Cardello, an experienced pharmacy and human resources professional, will play an integral role in business development efforts as CORE continues to expand their portfolio of products for both the academic and corporate markets.

With more than 25 years of leadership experience at the American Pharmacists Association (APhA), CVS Health, and the American Stores Company, Cardello brings with her a diverse background and unparalleled perspective on the eLearning, recruiting and experiential education needs and opportunities throughout higher education and healthcare.

Gregory Cianfarani, CEO of CORE Higher Education Group, said “There is a great need for health systems and larger corporations to more efficiently manage and educate their vast numbers of incoming students during the clinical/clerkship/practicum process, and Liz is uniquely positioned to support those initiatives.” In addition, “Liz has a uniquely distinct background that combines recruiting, online education, corporate relations, and experiential education - undoubtedly giving her the expertise to magnify CORE’s offerings as we grow into additional business landscapes.”

“CORE Higher Education Group has spent more than 14 years evolving their education platform into an innovative solution that addresses so many challenges being faced by schools, corporations, and health systems. I am excited about the opportunity to join such a respected company, and I look forward to contributing to CORE’s future growth and success,” shared Liz.

About CORE Higher Education Group:

Headquartered in Providence, Rhode Island, CORE Higher Education Group is a pharmacist owned and operated education technology company providing software applications that help manage the experiential education process for over 200 colleges and university programs across the US and Canada. Since 2006, CORE has grown to accommodate the experiential education, student competency assessment, co-curricular eLearning, recruiting, and digital portfolio needs for pharmacy education, as well as many other health science disciplines.
