

TESTIMONIAL

“CORE ELMS is a useful and powerful program for managing many aspects of clinical education”

Mary Baldwin University utilizes CORE to manage multiple clinical education programs at their institution.

“*I’m always so impressed with the whole CORE team.*”

“CORE is a useful and powerful program for managing many aspects of clinical education. Retrieving data, storing student requirements, organizing sites, and everything in between is **easier in CORE**.

My favorite part about CORE however is the CORE client success team. **They provide outstanding customer service**. My representative replies quickly with answers, detailed suggestions, and always offers to set a meeting to go through it together if I would like.

I’m **always so impressed** with how patient the CORE team is as they listen to what we need and come up with a solution to make it happen. Everyone we have worked with is responsive, knowledgeable, timely, and enthusiastic. **Knowing I have their support whenever I need it is outstanding.**”
